

Sherard Daniel Vyse

Data Scientist | AI/ML Engineer | Generative AI & Forecasting Specialist

sherardv@live.com | 8433568012

[GitHub](#) | [LinkedIn](#)

3+ years of experience as a Data Scientist and AI/ML Engineer delivering forecasting, analytics, dashboarding, and generative AI solutions across supply chain, logistics, enterprise data, and document intelligence use cases. Expertise in end-to-end ML pipelines, time-series forecasting, RAG and agentic AI systems, and business-facing dashboards that convert complex data into actionable insights.

TECHNICAL SKILLS

- Languages: Python, SQL, JavaScript, HTML, C
- Frameworks and Libraries: TensorFlow, Pytorch, Scikit-learn, NumPy, Matplotlib, Seaborn, SciPy, Pandas, NLTK, Streamlit, Fast API, Cuda, OpenCV
- Large Language Framework: OpenAI, Lang Chain, Hugging Face, Gemini

KEY SKILLS

- Artificial Intelligence (AI)
- Machine Learning
- Generative AI
- Time Series Modeling
- Data Analysis
- Data Visualization
- Predictive Analysis
- Model Development
- Natural Language Processing (NLP)

EXPERIENCE

AI/ML Engineer / Data Scientist, LeewayHertz (The Hackett Group)

Feb 2025 - Present

- **Americold:** Led capacity forecasting using Random Forest, Gradient Boosting, Linear/Multiple Regression, Prophet, and ARIMA/ARIMAX/SARIMA/SARIMAX/GARCH; built Streamlit dashboards with a FastAPI backend to present results.
- **Huntsman:** Built RAG-based document intelligence systems to extract text, charts and tables from documents and support multi-turn query and answering (Q&A).
- **Keysight:** Supported Salesforce integration with Z-Brain to connect CRM workflows with AI-enabled enterprise applications.
- **Northrop Grumman:** Supported AI/data solution design and forecasting workflows using client-provided data and business requirements.
- **Safe Guard:** Used different ML and Gen AI methods to analyze and classify images provided by client such that a higher accuracy was achieved as specified by client
- **LWH internal initiatives:** Contributed to agentic AI-based systems designed to automate multi-step workflows and improve solution delivery

Freelance AI Data Specialist, Soul AI

Feb 2024 – Dec 2024

- Worked on projects focused on training and improving large language models across text-to-text, speech-to-text and video-to-text workflows.
- Supported data preparation, response evaluation, annotation and quality-improvement workflows for multimodal AI systems.

Data Scientist, Marshal (Freelance)

Apr 2023 – Feb 2025

- Built dynamic dashboards using front-end user data and stakeholder feedback to help teams understand product usage, user behavior, feature adoption and business trends.
- Analyzed large datasets to identify usage patterns, performance gaps, and growth opportunities, translating findings into actionable recommendations for product and business stakeholders.

Data Scientist, Networth Corp

Feb 2022 – Apr 2023

Client: Anheuser-Busch

- Led capacity forecasting for Anheuser-Busch loads in hectoliters over an 8-week horizon, supporting cost savings and carrier allocation across the South America Zone (SAZ) in Brazil.
- Developed forecasting pipelines using Random Forest, Gradient Boosting, Linear/Multiple Regression, Prophet and time-series methods including ARIMA, ARIMAX, SARIMA, SARIMAX and GARCH.
- Created Power BI dashboards to present forecasting results, model outputs, operational trends and business performance insights to stakeholders.

EDUCATION

- Master of Science in Machine Learning & Artificial Intelligence **May 2021 – Dec 2021**
Liverpool John Moores University
Thesis Topic: "Forecasting Bitcoin price using Deep Learning with an attention mechanism"
- Post Graduate Diploma in Machine Learning & Artificial Intelligence, IIIT Bangalore **Mar 2020 – Apr 2021**
- Bachelor of Engineering (Mechanical), Hitkarni College of Engineering and Technology (RGPV) **Jul 2012 – Jun 2016**

CERTIFICATIONS

- Advanced Diploma in GBS – **The Hackett Group Inc.**
- Diploma in GBS – **The Hackett Group Inc.**
- Scaling Workloads Across Multiple GPUs with CUDA – **NVIDIA**
- Generative AI Certified Professional – **Oracle**
- Generative AI with Large Language Models – **DeepLearning.AI**
- TensorFlow Developer Professional Certificate – **DeepLearning.AI**
- Generative Adversarial Networks (GANs) Specialization – **DeepLearning.AI**
- Lidar Data Processing and Application – **ISRO**
